ABOUT ME

Software Engineer with experience in backend development, internal automation, API design, and cloud-based deployments. Worked with Go, TypeScript, PostgreSQL, Docker, Kubernetes, and Azure DevOps in production-related environments. Focused on building reliable internal tools, improving workflows, and supporting scalable platform features.

TECHNICAL SKILLS

Languages: Go, Java, TypeScript, SQL

Frameworks: Spring, React

Cloud and DevOps: Docker, Kubernetes, Helm, Azure DevOps

Databases: PostgreSQL

Practices: Code Review, API Development, Deployment Support, Internal Automation

SOFT SKILLS

Collaboration
Communication
Problem-solving

ZDRAVKO KRALEV

FULLSTACK SOFTWARE ENGINEER

EDUCATION

~SoftUni~

Completed Courses:
***Spring Advanced *Spring Data *Java Advanced *QA Fundamentals**

~New Bulgarian University~

Sound Engineer

Studied basic music theory and developed practical skills in mixing and mastering across different Digital Audio Workstations (DAWs).

EXPERIENCE

October 2024 - Present

Software Engineer II | Pros Bulgaria

- Led the development and ongoing support of an internal automation solution that replaced manual operational workflows and improved process efficiency across multiple teams.
- Delivered new backend features and API enhancements for an internal platform used to support business operations.
- Built and maintained deployment workflows with Azure Pipelines and developed Azure Function Apps for lightweight internal API automations
- Troubleshot and maintained staging and production Kubernetes environments to support reliable deployments and issue resolution.
- Reviewed pull requests and helped maintain code quality across the team.

September 2022 – October 2024

Software Engineer I | Pros Bulgaria

- Completed a structured engineering learning path covering Agile methodologies, JavaScript, TypeScript, React, Go, Docker, and Kubernetes.
- Contributed to a team project with four other interns as a final milestone of the internal training program.
- Built practical experience in collaborative software development and modern engineering workflows.

June 2022 – September 2022

Software Engineer Intern | Pros Bulgaria

- Trained across Agile methodology, JavaScript, TypeScript, React, Go, Docker, and Kubernetes.
- Successfully completed a team-based engineering project as part of the internship program.

April 2021 – June 2022

Customer Experience Associate | Crypto.com

- Provided customer support through chat and phone for application-related issues.
- Developed communication and problem-solving skills in a fast-paced customer-facing environment.
